

Groundwater

Groundwater

GROUNDWATER, (ISSN 1745-6584 [online]), is published bimonthly on behalf of the National Ground Water Association by Wiley Periodicals LLC, 111 River St., Hoboken, NJ 07030-5774 USA.

Publisher: *Groundwater* is published by Wiley Periodicals, Inc., 350 Main Street, Malden, MA 02148; tel: (781) 388-8200; fax: (781) 388-8210. For submission instructions, subscription and all other information visit: <https://ngwa.onlinelibrary.wiley.com/journal/17456584>

Disclaimer: *Groundwater* and the National Ground Water Association provide information for guidance and information purposes only. This publication is not intended to provide investment, tax, or legal advice. The issues addressed in *Groundwater* have been identified by NGWA as being pertinent to its mission, but the decision to address any particular issue should not be interpreted as an indication that such an issue is more or less important to the industry than other issues. The information contained herein has been compiled from sources deemed reliable and it is accurate to the best of our knowledge and belief; however, *Groundwater* and NGWA cannot guarantee as to its accuracy, completeness, and validity and cannot be held liable for any errors or omissions. All information contained herein should be independently verified and confirmed. The NGWA is funded in large parts by member dues, advertising, and donations and is not financially able to full explore all issues impacting the groundwater industry. The NGWA assumes no duty to its members or any party to investigate, evaluate, or disseminate information regarding any issue within the industry. *Groundwater* and NGWA do not accept any liability for any loss or damage howsoever caused in reliance upon such information. Readers agree to assume all risk resulting from the application of any of the information provided by *Groundwater* and NGWA.

Trademarks and copyrights mentioned within *Groundwater* are the ownership of their respective companies. The names of products and services presented are used only in an education fashion and to the benefit of the trademark and copyright owner, with no intention of infringing on trademarks or copyrights. No endorsement of any third-party products or services is expressed or implied by any information, material, or content referred to in the *Groundwater*.

Advertisers and advertising agencies assume liability for all content (including text, representation, and illustrations) of advertisements printed and also assume responsibility for any claims arising therefrom made against the publisher. The publisher reserves the right to reject any advertising it believes is unsuitable, misleading, or not within the publication's standards.

The views and opinions expressed herein do not necessarily reflect those of the Publisher, NGWA, and Editors. The publication of advertisements does not constitute any endorsement by the Publisher, NGWA, and Editors of the products advertised.

The Publisher, NGWA and Editors cannot be held responsible for errors or any consequences arising from the use of information contained in this journal. The views and opinions expressed do not necessarily reflect those of the Publisher, NGWA or Editors, neither does the publication of advertisements constitute any endorsement by the Publisher, NGWA or Editors of the products advertised.

About the Cover/

Conceptual diagram of aeration-enhanced in-situ bioremediation for trichloroethylene through a tandem circulation well. For more information, see "Model-Based Approach to Determine Critical Design Parameters for Tandem Circulation Well Remediation Systems."

Editor-in-Chief/
Kenneth Bradbury, Ph.D.
Ken.Bradbury@wisc.edu

Executive Editors/

Charles Andrews, Ph.D.
S.S. Papadopoulos & Associates, Inc.
